PROFESSIONAL SUMMARY

Aspiring Artificial Intelligence Engineer with hands-on experience in Machine Learning, Natural Language Processing, Computer Vision, and real-time AI systems. Skilled in developing AI-powered applications using Python, TensorFlow, PyTorch, OpenCV, and transformer-based architectures. Experienced in building intelligent automation systems, sentiment analysis models, and AI-driven solutions for real-world applications. Strong understanding of AI workflows, model optimization, feature engineering, and scalable problem-solving.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Machine Learning & AI: Machine Learning, Deep Learning, NLP, Computer Vision, Transformer Models, BERT, CNNs, Feature Engineering, Model Optimization

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, OpenCV, Hugging Face Transformers, Keras, NLTK, Pandas, NumPy, Matplotlib, Dlib

Generative AI & Modern AI: LLMs, Prompt Engineering, Lang Chain, OpenAI APIs, AI Automation Workflows, RAG Concepts

Developer Tools: Git, GitHub, Jupyter Notebook, VS Code, StreamLit, FastAPI

PROFESSIONAL EXPERIENCE

AI & Machine Learning Intern — Corizo EdTech Pvt Ltd (2024)

- Worked on real-world Machine Learning workflows involving preprocessing, model training, and performance optimization.
- Implemented AI models using Python and Scikit-learn for predictive analysis and intelligent automation tasks.
- Improved model performance through feature engineering, preprocessing techniques, and workflow optimization.
- Collaborated on AI-focused projects involving classification systems and real-time AI applications.
- Gained hands-on exposure to industry-standard AI development practices and model evaluation techniques.

PROJECTS

Legal Document Summarization System

- Developed an NLP-based legal document summarization system using transformer-based architectures and BERT models.
- Processed and analysed 5,000+ legal text samples for semantic summarization and contextual understanding.
- Improved semantic accuracy using ROUGE evaluation metrics and optimized NLP pipelines.
- Built an automated summarization workflow to reduce manual legal document analysis time.

Driver Drowsiness Detection System

- Developed a real-time driver fatigue detection system using OpenCV and facial landmark detection techniques.
- Implemented Eye Aspect Ratio (EAR) algorithms for intelligent alert triggering and fatigue monitoring.
- Achieved reliable real-time performance under low-light conditions through optimized detection workflows.
- Enhanced inference performance for continuous monitoring applications.

Smart India Hackathon — Farmer Query Resolution System

- Developed an AI-powered agricultural assistance platform for farmer query resolution and crop analysis.
- Integrated NLP and image-processing pipelines for crop disease diagnosis and intelligent recommendations.
- Simplified agricultural insights using AI-driven automation workflows and user-centric interfaces.
- Collaborated on scalable AI system design for accessibility and usability.

TextEmotionX — Sentiment Analysis Model

- Built an NLP-based sentiment analysis system capable of classifying emotions such as happiness, sadness, anger, and neutrality.
- Improved prediction accuracy through preprocessing, feature engineering, and text classification workflows.
- Implemented machine learning pipelines for scalable sentiment analysis and user behaviour insights.

Ant Colony Optimization for Pathfinding

- Implemented Ant Colony Optimization algorithms for shortest-path and intelligent route optimization problems.
- Simulated pheromone-based decision-making systems for graph-based navigation tasks.
- Improved convergence speed and optimization efficiency through parameter tuning and iterative refinement.

EDUCATION

MPSTME, NMIMS University — Bachelor of Technology (B-Tech) in Artificial Intelligence 2022
– 2027 | Percentage: 65%

IIITians PACE — Higher Secondary Certificate (HSC)
2020 – 2022 | Percentage: 60.33%

St. Dominic Savio High School — Secondary School Certificate (SSC)
2021 | Percentage: 90%

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Smart India Hackathon 2025 — Participant
- Corizo AI Internship Certification (2024)
- Java Workshop — NMIMS MPSTME (2025)
- AI Tools Workshop — Be10x (2026)

LEADERSHIP & ACHIEVEMENTS

Vice President of Relations — 4C, NMIMS

Managing collaborations, networking initiatives, and relationship-building activities across events and campaigns. Coordinating communication between teams, external collaborators, and organizational stakeholders.

Head of Marketing — 4C, NMIMS

Led digital marketing campaigns, audience engagement initiatives, and branding strategies. • Coordinated outreach, collaborations, and marketing execution across multiple activities.

Best Head Award — 4C Marketing Cell

Recognized for leadership, campaign execution, and contribution to marketing initiatives.
